## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, 15-34 and 37 drawn to an apparatus for conveying closures, classified in class 198, subclass 443.
- II. Claims 10-14, 35 and 36 drawn to a process for conveying closures, classified in class 198, subclass 617.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and of Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be used to practice the materially different apparatus such as with a packaging machine.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to HUNTON & WILLIAMS LLP on 12/9/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3651

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
